MATHEMATICAL METHODS IN THE APPLIED SCIENCES

Issue No. 1, 10 January 2002

In Memoriam—Professor Erhard Meister 1

Global Solution Curves for Semilinear Systems: P. Korman 3

Eigen-frequencies in Thin Elastic 3-D Domains and Reissner–Mindlin Plate Models: M. Dauge and Z. Yosibash 21

Theoretical Tools to Solve the Axisymmetric Maxwell Equations: F. Assous, P. Ciarlet Jr. and S. Labrunie 49

Bound for Resolvent of Second Order Elliptic Operator in Low Spectral Stripe: A. Łada and L. Sidz 79

Issue No. 2, 25 January 2002

On a Boundary Variational Inequality of the Second Kind Modelling a Friction Problem: H. Guediri 93

Single-phase Flow in Composite Poroelastic Media: R. E. Showalter and B. Momken . . 115

A (3+1)-dimensional Painlevé Integrable Model Obtained by Deformation: J. Yu and Z. Lou 141

The Effect of a Surface Energy Term on the Distribution of Phases in an Elastic Medium with a Two-well Elastic Potential: M. Bildhauer, M. Fuchs and V. Osmolovskii 149

Issue No. 3, February 2002

Non-linear Initial Boundary Value Problems of Hyperbolic–Parabolic Type. A General Investigation of Admissible Couplings between Systems of Higher Order. Part I: Linear Theory: S. Ebenfeld 179

Non-linear Initial Boundary Value Problems of Hyperbolic–Parabolic Type. A General Investigation of Admissible Couplings between Systems of Higher Order. Part II: Abstract Quasilinear Theory: S. Ebenfeld 213

Non-linear Initial Boundary Value Problems of Hyperbolic–Parabolic Type. A General Investigation of Admissible Couplings between Systems of Higher Order. Part III: Applications: S. Ebenfeld 241

Issue No. 4, 10 March 2002

Homogenization of the Linearized System of Elasticity in Anisotropic Heterogeneous Thin Cylinders: A. Sili 263

The Effect of a Penalty Term Involving Higher Order Derivatives on the Distribution of Phases in an Elastic Medium with a Two-well Elastic Potential: M. Bildhauer, M. Fuchs and V. G. Osmolovskii 289

Phase-field Systems for Multi-dimensional Prandtl–Ishlinskii Operators with Non-polyhedral Characteristics: J. Sprekels and P. Krejčí 309

Infinitely Many Stationary Solutions for a Simple Climate Model via a Shooting Method: J. I. Díaz and L. Tello 327

Mathematical Modelling of Drug Resistant Malaria Parasites and Vector Populations: S. J. Aneke 335

Potential Splitting and Numerical Solution of the Inverse Scattering Problem on the Line: T. Aktosun and P. E. Sacks 347

Issue No. 5, 25 March 2002

Symmetric Coupling of Finite and Boundary Elements for Exterior Magnetic Field Problems: M. Kuhn and O. Steinbach 357

On the Stokes System and on the Biharmonic Equation in the Half-space: An Approach via Weighted Sobolev Spaces: T. Z. Boulmezaoud 373

Optimal Control of Singular Systems via Piecewise Linear Polynomial Functions: M. Razzaghi and H. R. Marzban 399

Thermoelasticity with Second Sound—Exponential Stability in Linear and Non-linear 1-d: R. Racke 409

ANNOUNCEMENT i

Issue No. 6, April 2002

On a Thermoelastic Plate Equation in an Exterior Domain: Y. Enomoto 443

An Optimal Shape Design Formulation for Inhomogeneous Dam Problems: A. Chakib, T. Ghemires and A. Nachaoui 473

An Upper and Lower Solution Approach for Singular Boundary Value Problems with Sign Changing Non-linearities: R. P. Agarwal and D. O'Regan 491

Existence of Solution in Elastic Wave Scattering by Unbounded Rough Surfaces: T. Arens . 507

Issue No. 7, 10 May 2002

Legendre Wavelets Method for Constrained Optimal Control Problems: M. Razzaghi and S. Yousefi 529

On a Non-uniqueness in Fragmentation Models: J. Banasiak 541

Numerical Analysis of a Non-singular Boundary Integral Method: Part II: The General Case: P. Dreyfuss and J. Rappaz 557

A New Consistent Discrete-velocity Model for the Boltzmann Equation: V. A. Panferov and A. G. Heintz 571

Domain Sensitivity Analysis of the Acoustic Far-field Pattern: M. Bochniak and F. Cakoni . 595

Issue No. 8, 25 May 2002

Solving (3+1)-dimensional Non-linear Schrödinger Equation by means of (3+1)-dimensional Painlevé Integrable Model: H.-Y. Ruan and Y.-X. Chen 615

Non-standard Stokes and Navier–Stokes Problems: Existence and Regularity in Stationary Case: J. M. Bernard 627

Asymptotic Behaviour of Global Smooth Solutions to the Multidimensional Hydrodynamic Model for Semiconductors: L. Hsiao, S. Wang and H. Zhao 663

On the Asymptotic Positivity of Solutions for the Extended Fisher–Kolmogorov Equation with Nonlinear Diffusion: M. Bartuccelli 701

Issue No. 9, June 2002

The l.s.c. Regularization of the Signorini Problem: J. L. Bojarksi and H. De Schepper . . 709

Coalescence and Breakage Processes: C. Walker 729

A Singularly Perturbed Problem of Photon Transport in a Time-dependent Region: R. Riganti and F. Salvarani 749

Asymptotic Convergence of p-Laplance Equations with Constraint as p Tends to 1: K. Shirakawa 771

Issue No. 10, 10 July 2002

Existence and Asymptotic Behaviour of Solutions for a Class of Quasi-linear Evolution Equations with Non-linear Damping and Source Terms: Y. Zhijian 795

Note on the Existence and Uniqueness of Optimum Lifting Surfaces with Reduced Tip Vorticity: J. A. Sparenberg and E. G. F. Thomas 815

Blowup of Solutions for a Class of Non-linear Evolution Equations with Non-linear Damping and Source Terms: Y. Zhijian 825

A Model of a General Elastic Curved Rod: A. Ignat, J. Sprekels and D. Tiba 835

On Corner Irregularities that Arise in Hyperbolic Shell Membrane Theory: J. Piila and J. Pitkaranta 855

The Neumann Problem, Cylindrical Outlets and Sobolev Spaces: G. Thäter 875

Issue No. 11, 25 July 2002

Life span of 2-D irrotional compressible fluids in the halfplane: P. Secchi 895

A critical exponent in a degenerate parabolic equation: M. Winkler 911

Electromagnetic scattering by a perfectly conducting obstacle in a homogenous chiral environment: solvability and low-frequency theory: C. Athanasiadis, G. Costakis and I. G. Stratis 927

A mathematical model for a spatial predator–prey interaction: A. Palumbo and G. Valenti . 945

Asymptotic behaviour and exponential stability for a transmission problem in thermo-elasticity: A. Marzocchi, J. E. Muñoz Rivera and M. Grazio Naso 955

Issue No. 12, August 2002

About embedded eigenvalues for a spectral problem arising in the study of elastic surface waves in a topographical waveguide: M. Sini 981

The scattering theory of C. Wilcox in elasticity: M. Mabrouk and Z. Helali 997

On the domain dependence of solutions to the compressible Navier–Stokes equations of a barotropic fluid: E. Feireisl, A. Novotny and H. Petzeltová 1045

The mapping properties of the radiosity operator along an edge: O. Hansen 1075

Issue No. 13, 10 September 2002

Vorticity–velocity–pressure formulation for the Stokes problem: F. Dubois 1091

On singular mono-energetic transport equations in slab geometry: M. Chabi and K. Latrach 1121

Some existence results for conservation laws with source-term: J.-P. Dias and P. G. LeFloch 1149

Issue No. 14, 25 September 2002

Variational problems in Clifford analysis: J. Dubinskii and M. Reissig 1161

Weak solutions of a phase-field model for phase change of an alloy with thermal properties: J. L. Boldrini and G. Planas 1177

Global existence of weak-type solutions for models of monotone type in the theory of inelastic deformations: K. Chelmiński 1195

An asymptotic-induced one-dimensional model to describe fires in tunnels: I. Gasser and J. Struckmeier 1231

Issue No. 15, October 2002

The equations of non-homogeneous asymmetric fluids: an iterative approach: C. Conca, R. Gormaz, E. E. Ortega-Torres and M. A. Rojas-Medar 1251

Visco-elasto-plastic model for martensitic phase transformation in shape-memory alloys: P. Plecháč and T. Roubíček 1281

Note on a versatile Liapunov functional: applicability to an elliptic equation: J. N. Flavin and S. Rionero 1299

Existence of multiple positive solutions for $-\Delta u-\mu(u/|x|^2)=u^{2^*-1}+\sigma f(x)$: T. Cheng and C. X. Zhao 1307

Issue No. 16–18, November–December 2002

Special Issue:
Clifford Analysis in Applications

Editorial 1337

The Schrödinger equation and a multidimensional inverse scattering transform: S. Bernstein 1343

Boundary value problems for Dirac operators and Maxwell's equations in non-smooth domains: M. Mitrea 1355

Representation theory for classes of initial value problems with quaternionic analysis: K. Gürlebeck and W. Sprößig 1371

An analogue of the Sommerfeld radiation condition for the Dirac operator: V. V. Kravchenko and R. Castillo P 1383

Hermitian Clifford analysis and resolutions: I. Sabadini and F. Sommen 1395

Computational algebraic analysis methods in Clifford analysis: I. Sabadini and D. C. Struppa 1415

Weighted singular integral operators in Clifford analysis: J. B. Reyes and R. A. Blaya . . 1429

Some properties of the Cauchy-type integral for the time-harmonic relativistic Dirac equation: B. Schneider and M. Shapiro 1441

Clifford analysis on projective hyperbolic space II: F. Sommen, P. Cerejeiras and U. Kähler . 1465

Clifford–Bessel wavelets in Euclidean space: F. F. Brackx and F. C. Sommen 1479

The spherical X-ray transform: P. Cerejeiras, H. Schaeben and F. Sommen 1493

Bergman kernels for rectangular domains and multiperiodic functions in Clifford analysis: D. Constales and R. S. Kraußhar 1509

Clifford analytic complete function systems for unbound domains: D. A. Lakew and J. Ryan 1527

Almansi-type theorems in Clifford analysis: H. R. Malonek and G. Ren 1541

On conjugate harmonic functions in Euclidean space: F. Brackx, R. Delanghe and F. Sommen 1553

On finite difference potentials and their applications in a discrete function theory: K. Gürlebeck and A. Hommel 1563

Complex-distance potential theory, wave equations and physical wavelets: G. Kaiser . . 1577
